

ADDENDUM NO. TWO (2)

The Construction Drawings and/or Project Manual for the above project are amended in the following particulars and in these particulars only. All provisions of the original drawings and/or specifications shall remain in force, except as specifically modified or changed herein or by other Addenda issued by the Architect. This Addendum is hereby made part of the Contract Documents. Be sure to note Addendum on Acknowledgment on Bid Proposal Forms.

PROJECT MANUAL/SPECIFICATIONS/CLARIFICATIONS (PM):

Item No. PM-1: ADD Paragraph 1.24 as follows:

“1.24 ADDITIONAL PRE-BID CONFERENCE:

- A. An additional non-mandatory Pre-Bid Conference will be scheduled for each Project Site so that Bidders may inspect the sites as they require before providing a Bid Proposal.
- B. Massalina Memorial Homes Site:
On-Site meeting Scheduled for February 13, 2020, 2:30pm (CT) local time. Meet at the intersection of Frank Nelson Drive and Joe Lewis Drive.
- C. Fletcher Black Memorial Homes Site:
On-Site meeting Scheduled for February 13, 2020, 3:30pm (CT) local time. Meet at the Maintenance Complex on Bob Sikes Drive.”

Item No. PM-2: Refer to Section 01 10 00, Summary:

a. ADD new Subparagraph 1.4.A(9) as follows:

“9. Incorporate the February 6, 2020 Pre-Bid Conference Meeting Minutes (attached).”

DRAWINGS:

None.

The following represents our understanding of project related issues, discussions and conclusions reached, as a result of the above referenced meeting. This documentation is intended to be used as project information. Please notify us within five working days of receiving this document of any additions, corrections or modifications. This memorandum will be considered accurate unless notified in writing otherwise. Items in brackets [] may not have been discussed but are included as additional or follow-up information.

Meeting Minutes 02.06.20

PCHA Phase 1 Demolition Project RFP #2020-01

Pre-Bid Conference

Page 2 of 3

PURPOSE & INTRODUCTION:

This Pre-Bid Conference was scheduled to allow all potential Bidders for the referenced project to visit each of the two project sites and make their own observations regarding the existing conditions.

A thundershower occurred during the beginning of the Massalina Memorial Homes site meeting. Light rain continued throughout the day. This rainstorm came up relatively quick in the region and there were potentially bidders already travelling to Panama City from interstate locations, therefore cancelling the meeting was not a reasonable option.

The Architect stated that another non-mandatory Pre-Bid Conference could be potentially scheduled during better weather conditions (please check for Addenda frequently).

A. Massalina Memorial Homes:

1. Two units were walked-thru as a group to observe the general interior conditions. Furniture, appliances and otherwise personal items of previous tenants remained scattered throughout the interior of the units. These items were noted as needed to be disposed of by the Contractor as a part of the demolition and removal of structures, etc.
2. The attendees were allowed to make their own observations on the property.
3. Openings in the exterior wall confirmed the first level was reinforced 8" masonry with a 4" brick veneer exterior cavity wall and with interior finishes.

B. Fletcher Black Memorial Homes:

1. Three units were walked-thru as a group to observe the general interior conditions. Furniture, appliances and otherwise personal items of previous tenants remained scattered throughout the interior of the units. These items were noted as needed to be disposed of by the Contractor as a part of the demolition and removal of structures, etc.
2. The attendees were allowed to make their own observations on the property.
3. Openings in the exterior wall confirmed the first level was reinforced 8" masonry with a 4" brick veneer exterior cavity wall and with interior finishes.

C. General:

Meeting Minutes 02.06.20

PCHA Phase 1 Demolition Project RFP #2020-01

Pre-Bid Conference

Page 3 of 3

1. Architect requested that all questions be submitted in writing so that official responses could be provided by Addendum and noted the last day for written questions to be received is February 10 (Addendum No. 1 Item #PM-2(b)).
2. Architect noted the Bids are now due February 20, 2020 at 2:30pm CT per Addendum No. 1, (multiple Items).
3. Architect stated that Bidders are required to provide pre-demolition and post project boundary and physical characteristics (topographic, above and below ground improvements, etc.) as specified in the Project Manual prepared by a licensed Surveyor in the State of Florida.
 - a. Not locating all improvements and/or physical improvements on the Surveys do not relieve the Contractor from any responsibilities for demolition and removal of items per the Bidding Documents.
 - b. The surveys will be allowed to be used to document the amounts (types and quantities) of impervious surfaces on the sites for future development permitting purposes.
 - c. The surveys will be allowed to be used by the Owner for future development permitting purposes of the rebuilding/redeveloping of the sites.
4. Architect advised the attendees that all above and underground utilities and other improvements (including, but not limited to, foundations, pipes, tanks, etc.) are to be demolished and removed from the property line inward at each parcel of each project site as described in the Project Manual/Specifications.
 - a. Contractors may decide to keep selected water meters operational to meet temporary irrigation requirements specified, but remove the apparatus at the completion of the project as specified.
5. A few attendees commented about the requirement for unit prices on the Bid Form. The Architect generally indicated that the unit prices requested are mostly for the possibility of removing the existing roadways, and related curbs and gutters and concrete sidewalks between parcels on each site IF added to the project scope.
6. Architect suggested to all attendees that the Contractor review the sequential requirements of the project scope and outline a project schedule that addresses the critical path requirements for their individual benefit. Review the Summary of Work and other sections to analyze the surveying, asbestos abatement, utility disconnections & terminating, demolition and debris removal operations for efficiency and to properly complete the work required.

D. Adjournment:

1. The meetings were adjourned without further discussion.
